Oral pathologist and Implantologist

Master of Dental Surgery, Oral and Maxillofacial Pathology
Post Graduate Course in Oral Implantology, RGUHS, Bangalore

INTERNATIONAL ACADEMY OF ORAL IMPLANTS & LASERS®

Bangalore

Oral implantology has been an integral part of the dental practice in the present scenario. Implants provide us a reliable treatment method for replacing the missing teeth without hampering the adjacent healthy teeth. From single tooth replacement to full mouth rehabilitation, implantology has taken leaps and bounds in the technicality.

Objective: Clinician has to upgrade the skills to practice implantology on a day to day basis. Many times patient with implants might require multiple appointments specific to various steps performed. The clinician confident of executing surgery, prosthetic steps and maintenance can provide excellent care to the need of the patients.

Our academy focusses on enabling the clinicians to perform implant procedures accurately and to instill the confidence to perform all the steps of implantology. We focus on biology, tissue health, esthetics and success of implants and not only on the mechanical aspects of implantology.

Modus operandi & Course details:

Module 1: Minimum 10 hours of lecture will be conducted comprising of Basic implantology, tissues around implants, implant designs, components of implants, surgical procedures, advanced implantology procedures, prosthetic components and impression techniques, suturing, maintenance and treatment of periimplantitis.

Module 2: Hands –on of placing implants on the maxilla and mandible models.

Module 3: Prosthetic procedures on the study model

Module 4: Observership: Live surgery will be observed by the participants

Personalised scheduling: The time and schedule of the lectures and implant placement can be personalised according to the convenience of the participants.

Motto: Course participants shall be practicing implantology independently

Post course assistance: Implant planning and execution can be discussed for few cases even after completing the course.

ICOI Fellowship: Participants will be encouraged and assisted to apply for “Fellow of International Congress of Oral Implantology”. ICOI is an internationally recognised implant organisation and their fellowship will be an added advantage for the implant practice.

Post course support: Participants can discuss their cases with the mentor after completing the laser course. Whatsapp group is created for smooth discussion of the cases before and after the procedures

Frenectomy

Dental Fluorosis

Students' Feedback

The implant course at the IAOIL is a professionally organized intensive training course which gives you a complete Hands-on experience with patients. Participants perform all the procedures (surgical and prosthetic aspects) independently and at their own pace under the expert guidance and personalized attention by Dr. Shivaprasad BM himself. The implant academy has a comfortable working environment with all necessary equipment, materials and state-of-the-art technology. Each case is documented following international standards, which enables you to apply for various licensures and certificates. They provide assistance to compile cases according to the ICOI guidelines and help in the application process as well. This enabled me to apply and receive the "Fellowship of the International Congress of Oral Implantologists". Attending this course means learning by doing and this has definitely boosted my self-confidence. The quality of the course is amplified by the teamwork, dedication and passion of the entire team. I would highly recommend the IAOIL for a great and rewarding learning experience!

- Dr. Jovita Dsouza

The IAOIL is one of the very few places that emphasises on hands on training to the word. The course structure is designed to cater individual candidate's needs so that the skills are attained to be at par with the independent practitioner's requirements of today. Dr Shivaprasad's knowledge is amazing and the passion with which he guides inculcates the zeal to learn more and be the best... Thank you so much sir ... it is the best academy and I highly recommend

- Dr. Deepa Deshpande
